Airport and Maritime
Operations Manual

Maritime Operations

Overview

PPQ staffs airports to minimize the risk of introducing agricultural pests associated with the movement of vessels. All vessels from foreign locations, U.S. territories and possessions, and Hawaii are subject to inspection.

The Maritime Operations portion of the *Airport and Maritime Operations Manual* is organized by tasks which are tabbed as follows:

- ◆ Prerequisite to Clearing Vessels
- ◆ Clearing Vessels
- ◆ Controlling Garbage
- ◆ Controlling Cargo
- ◆ Clearing Passengers/Crew

Use the table of contents which follows each tab to find the information you need. If the table of contents is **not** specific enough, then turn to the index to find the topic and its page number.
